```

Localisation 1				
France	Occitanie	<b>Hérault</b>	Montpellier	Zoo

Localisation 2			
France	Occitanie	<b>Hérault</b>	Nîmes

Localisation1[0] == Localisation[0] .....✓

Localisation1[1] == Localisation[1] .....✓

Localisation1[2] == Localisation[2] .....✓

Localisation1[3] != Localisation[3] .....X

} On renvoie Localisation[2] car  
c'est le plus grand indice en  
commun et donc on return

**Hérault**
